DSL Setup Sheet

Thank you for signing up with SDC Internet for your DSL service!

You should be receiving your DSL Modem (the ActionTec 701-WG) from Qwest. Once you have received it, read the instructions that come with it closely and proceed with the installation. The software is simple and easy to use, and will walk you through everything you need to do.

You will need the following information, however:

- 1) When it asks you for your service provider, select "Other ISP".
- 2) Your ISP Protocol is "PPPoA".
- 3) When it asks for your "PPP User Name" and "PPP Password", enter the username and password you signed up with at SDC. If you are also a dial-up customer, this will be the same as your existing username and password.
If you have signed up for the Platinum service (greater than 1.5Mbps) add @sdc.org to your username.
- 4) Finally, you will be asked for your "IP Type". This is "Dynamic IP (DHCP)".

Finish following the instructions on the screen, and when setup is complete it will tell you that you are finished and you are connected to the internet. If you experience a problem, please call our office at (505)-838-1620.

Summary:

Service Provider: Other ISP

ISP Protocol: PPPoA

PPP User Name: Your existing SDC username
(add @sdc.org onto the end of
it for above 1.5Mbps)

PPP Password: Your existing SDC password

IP Type: Dynamic IP (DHCP)
